"May I take this opportunity to thank you from the bottom of my heart once again on behalf of our family for a job well done. I have been thoroughly impressed from the beginning with the UC San Diego CADC Hispanic program for those patients afflicted with Alzheimer's and related dementia diseases. But more so, impressed with the special attention and care our family received through the duration of the CADC program. Your presentation to us this week with your findings is greatly appreciated. I know it was an education for myself, but an unbelievable education for the entire family. It is just as important to me that you folks receive the necessary feedback to keep your program as it was for my mother in law to receive the finest care."

- Letter addressed to our social worker, Frances Goodrich, MSW, from the daughter-in-law of a patient.
